

PROTECT·A·BED®

SHIELD YOUR MATTRESS

Our Miracle Membrane® Provides Best in Class Protection

As part of Protect-A-Bed's mission to provide best in class products that protect your bed, your guest, and your investment, we've recently undergone independent lab testing to ensure our products meet the evolving needs in hospitality to combat COVID-19. Our waterproof Miracle Membrane® used on both AllerZip Smooth and BugLock Plus has passed the CDC standard for Viral Penetration (ASTM F1671). This testing certifies that the Miracle Membrane in these products provides the highest level of barrier protection (level 4).

Additional testing (AATCC G22) was also performed to determine the products' resistance to bacteria. Both AllerZip Smooth and BugLock Plus have passed the lab test to confirm their anti-bacterial properties. AllerZip Smooth has also been certified Asthma and Allergy Friendly™ by the Asthma and Allergy Foundation of America and is classified by the FDA as a class 1 medical device.
